

Control your ENERGY Costs and Minimize your Risks

Different risks occur in different types of energy markets, and energy risk management strategies may vary depending upon which sector of the energy industry is being evaluated. The [electricity market](#), for instance, may pose different threats to a company than the oil or [natural gas](#) markets. Other factors that often present energy risks include climate change and environmental concerns.

*Example of AresNRG-Emex Fixed Rate vs Public Utility Rate
Rates are all based usage and will vary by Utility Co and location*

Companies may use the services of an [energy consulting firm](#). These firms are highly knowledgeable about the energy industry. We, **aresnrg**, are one those companies.

and WE help companies create solid energy risk management plans. In addition, We assist companies with assessing the impact of energy regulations. We also assist with [energy purchasing](#), evaluating energy costs, and developing energy conservation plans.
